

RESTART & BETTER PARTNERSHIP

ENHANCE PATIENT SAFETY WITH ELECTRONIC PRESCRIBING AND MEDICATION ADMINISTRATION

We configure, install, and integrate Better Meds with your existing workflows, PAS/EPR and other clinical and pharmacy systems. Bring collaboration, efficiency and decision support to medication management and enhance patient safety today.

HOW WE CAN HELP

MDT COLLABORATION

Better Meds supports multidisciplinary coordination between doctors, pharmacists and nurses by providing doctors with safer electronic medication prescribing supported by prompt feedback from pharmacists. With the help of a clear medication overview, nursing staff no longer have to contend with illegible prescriptions and doses.

IMPROVE EFFICIENCY

With integrated decision support, allergy and interactions checking and definitions of standard treatment Better Meds ensures faster access to the right medications and fewer prescribing errors. Moving away from paper prescribing and administration leads to less missed doses and chart rewrites, saving prescribing time and improving the accuracy of discharge prescriptions.

GUARANTEED PERFORMANCE

Our experience across all major integration engines, healthcare message formats, standards and protocols, means we streamline the addition of Better Meds to your existing integration environment. Our integration architects understand your requirements and configure your solution to act as a coherent whole.

BENEFITS

- Reduce prescribing errors
- Save time & money
- Accurate discharges
- Stock management
- Trend & analysis reports
- Define custom warnings
- Intuitive user interface
- Comprehensive training
- 24/7 support

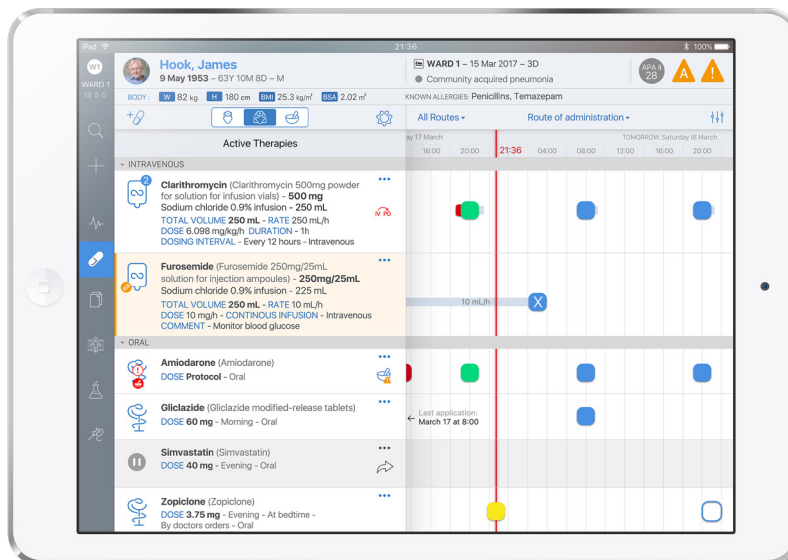

RESTART & BETTER PARTNERSHIP

ENHANCE PATIENT SAFETY WITH ELECTRONIC PRESCRIBING AND MEDICATION ADMINISTRATION

BETTER MEDS KEY FEATURES

- Clinical decision support
- Prepared order sets
- Medicine reconciliation
- Advanced pharmacist review
- Antimicrobial stewardship
- Built in paracetamol rule
- Titration support
- Mental health scenarios
- Simple intuitive interface
- Configurable dm+d drug database

The mental health trust South London and Maudsley NHS Foundation Trust selected ReStart to deploy a single integration platform to support its Better Meds ePMA procurement.

The trust will move from point to point interfacing into a cloud hosted (Azure) HealthShare Health Connect environment (the TIE) enabling it to integrate pathology results, medications and discharge summaries with Better Meds. ReStart ensure all messages passing through the TIE are transformed to meet Better's specification and any receiving interfaces from Better Meds will be transformed to ePJS (Carenotes) requirements.

The partnership with ReStart, InterSystems and Better ensures that the trust can move forward with its digital plans and connect across the whole Healthier South East London ICS and the wider LHCRE One London.

For efficient ePMA integration email us at hello@restartconsulting.com, call us on **01392 363888** or visit www.restartconsulting.co.uk to find out more.
