

DATA SHARING CHECKLIST

Assess the level of data sharing with your organisation.
Tick if you agree with the questions below.

CLINICAL EFFICIENCY

- 01 Is data entered into systems once by clinicians, and then shared? ☐
- 02 Do clinicians log into one system to access all the patient data they need? ☐
- 03 Do healthcare professionals access data they need from wherever they deliver care? ☐
- 04 Is data exchanged between systems correctly and without error? ☐
- 05 Do healthcare professionals access caseloads digitally, together with patient information? ☐

DIGITAL PROCESSES

- 06 Do you have automated digital workflows and care plans? ☐
- 07 Have you stopped transferring patient notes by paper or fax? ☐
- 08 Are diagnostic tests/results requested and shared digitally, without risk of duplication? ☐
- 09 Does real-time data support clinical decision making? ☐
- 10 Is data being used to manage patient flow through your organisation or care system? ☐

COLLABORATION

- 11 Do healthcare professionals outside of your organisation have access to your data? ☐
- 12 Do patients and carers have access to the information they need? ☐
- 13 Do health and care professionals have access to GP data, including medications? ☐
- 14 Do members of MDTs all have access to each other's data? ☐
- 15 Are your clinicians part of the process when designing data sharing systems? ☐

TECHNOLOGY

- 16 Do all of your IT systems intercommunicate and pass data between them? ☐
- 17 Is there an integration engine or interoperability platform to easily connect new systems? ☐
- 18 Do you have an eprescribing solution for safe medicine management and administration? ☐
- 19 Are you confident that data is adhering to national standards, eg SNOMED, HL7 and FHIR? ☐
- 20 Can your systems deal with both structured and unstructured data? ☐

STRATEGY

- 21 Do management have dashboards displaying data about performance of their services? ☐
- 22 Are you making fast progress with your digital strategy to improve patient outcomes? ☐
- 23 Do you have short technology deployment cycles of three months or less? ☐
- 24 Is your data available to support population health management and vulnerable groups? ☐
- 25 Do you have robust business continuity processes for when key systems are unavailable? ☐

Any no's? Send the checklist to
hello@restartconsulting.com and our
integration experts will be in touch with
advice on what to do next.
